Document 3: JP, 2000-324177, A (Hitachi, Ltd.)</p> <p>(Claims 1 and 13) Document 1 cited in the ISR discloses a technique in which a packet from a network is transmitted to a parallel line by performing load distribution.</p> <p>(Claims 2-12 and 14-24) In addition, document 2 cited in the ISR discloses that (1) traffic over a plurality of routes in a network is classified into each group in response to the property of a packet, and (2) routes at every group are set. Moreover, in response to what kind of the properties of the packet is used to classify at the time of classifying into each group is a mere matter of design variation that a person skilled in the art could have selected as required.
